Addendum To Health & Wellness Coaching Certificate Program Catalog & Handbook, 2020

Regular and substantive active participation online is required in order to achieve the minimum 80% attendance standard for graduation. A student is considered to be attending online courses by participating actively in classes. Active participation is defined as regular and substantive interaction and includes such activities as contributing to online discussions, text chat sessions, submitting assignments or taking assessments. It should be noted that logging into class without active participation as defined above does not constitute participation and therefore no attendance is given for non-participation. The last day of attendance is considered to be the last day that a student actively participated in class
